#### Brandable Work-from-Home VoIP Services.

Telinta recently announced an impressive suite of Cloud-based solutions to serve the growing global need for your business customers [Work-from-Home](#) employees. Telinta customers can profit from this growing opportunity, whether your customers are in the office, working from home, or on the road.

**Work @ Home**

At the center of Telinta's *Work from Home* capabilities is our award-winning *Virtual Office* solution. *Virtual Office* puts an impressive array of communications capabilities at the user's fingertips, enabling them to conduct important business processes wherever and whenever they need, even if unexpected conditions arise.

With *Virtual Office*, users can quickly route or re-route calls anywhere they need, without needing IP phones and without needing installer visits. Users can sign up online, select their own DIDs and toll-free numbers, set up PBX extensions, configure auto-attendants, voicemail, and music on hold, send and receive faxes, host conference calls, and more.

Click [here](#) for more details and a free "Try Me" demo of Virtual Office.

#### Virtual Office Advantages:

- ▶ Makes attractive PBX features available to small and home-based business
- ▶ Intuitive user interface
- ▶ Can route calls to existing Landline and Mobile phones
- ▶ Integrated with Telinta's Softphone solutions: Mobile, Desktop, WebRTC
- ▶ Flexible routing and re-routing, even from a smartphone or tablet on the go
- ▶ Increased accessibility via Simultaneous Ringing, Fax-to-Email, IVR, and more
- ▶ Competitive Advantage for both you and your customers

## Solutions

### New Auto-Provisioning Profile for Yealink VC500.

Now more than ever, interest in video communications around the world has grown significantly, creating new opportunities for Telinta customers to grow their business.

Telinta recently developed an Auto-Provisioning Profile for the Yealink VC500, an attractive video-capable IP phone.

Like all of our Auto-Provisioning Profiles (supporting roughly 200 models from industry-leading manufacturers), any number of devices can be provisioned without the need for manual configuration or installer visits.

Since 2002, Telinta's Auto-Provisioning has been used reliably by VoIP service providers around the world with IP phones made by Cisco, Polycom, Yealink, Snom, Grandstream, Fanvil, Gigaset, Uniden, Panasonic, VTech, and other manufacturers. Our codec-transparent platform offers a cloud-based solution for provisioning many popular audio and video-capable devices.

## More Solutions

### SMS Partner Integration

Telinta recently integrated a new SMS provider into our TeliCore platform. The provider, named "SMS Partner" offers SMS services which can be used in 120 countries and with more than 800 operators. SMS Partner was launched in 2014.

SMS Partner can be used for important functions like billing notifications and password resets.

Please contact [support@telinta.com](mailto:support@telinta.com) to enable SMS Partner for your Environment.
