### Issue N°48 April 2023 EDITION

#### Special Announcement

##### STIR/SHAKEN Webinar with TransNexus

As the FCC's June, 2023 deadline approaches, Telinta has teamed up with TransNexus, a leader in developing innovative solutions for call authentication and robocall mitigation, to jointly present an educational webinar for Internet Telephony Service Providers (ITSPs).

TransNexus will discuss its solution to help Telinta customers comply with STIR/SHAKEN call authentication and robocall mitigation regulations. TransNexus provides solutions for ITSPs located both inside and outside the United States, for both inbound and outbound traffic.

Since 2021, the ClearIP solution from TransNexus has been integrated with Telinta's Switching and Billing platform.

**Webinar Date:** **April 18, 2023, 11 a.m. EDT (UTC-4)**

Click [here](#) to register for the webinar.

#### News Flash

##### New Option for Global Currency Conversion

Telinta provides cloud-based switching and billing to VoIP service providers all over the world. This includes fast, easy access to currency conversions to help you do business.

We recently integrated ExchangeRatesAPI.io into our TeliCore™ platform. This third-party provider offers currency exchange rates for 168 currencies worldwide.

Please contact [support@telinta.com](mailto:support@telinta.com) to learn more.

## Solutions

### In-App Sign-Up Gets Even Easier for your Mobile Users!

Telinta has made it even easier for new users to sign up for your Mobile VoIP service merely by tapping a QR code on a mobile device or touch-screen computer. Users simply tap the QR image with their finger, without needing to scan the code.

As part of the solution's "In-App Sign-Up" capability, this feature enables users to create a new account directly from your brandable Mobile Softphone app in addition to using our online sign-up tools.

Now you can provide users with the options to scan QR code from the app's sign-in screen, entering credentials manually or simply tapping a QR code directly from the brandable Mobile Softphone app.

If you currently use our brandable Mobile Softphone solution, please contact [support@telinta.com](mailto:support@telinta.com) to learn more about how to offer In-App Sign-Up. If you do not currently use our brandable Mobile Softphone solution, please contact [info@telinta.com](mailto:info@telinta.com) for pricing and more details.

## Best Practices

### Configuring Resellers for Brandable Softphones

Telinta offers a robust portfolio of Softphone solutions, which can be used with a generic brand, or customized with your own brand, logo, URL, and more.

If you have Resellers, each Reseller can have their own branded Softphone too.

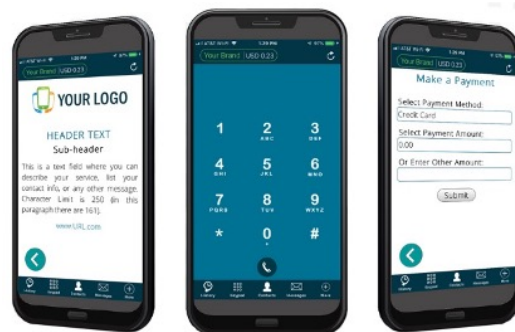

That Reseller entity (which you configure within your Telinta environment) can use one version of Telinta's Softphone solutions, while another of your Resellers can use a completely separate version. You can even use yet another version with your own end users that buy from you directly, and are not served by a Reseller.

By "version" we mean either a branded version, or the generic non-brandable version of our Softphone solutions. For example, Reseller A can use Brand A, while Reseller B uses Brand B, while Reseller C uses a non-brandable generic version.

You can use as many different versions of our Softphone solutions as you need, as long as each version is separated by a Reseller configuration. If you use multiple Softphone solutions (Mobile, Desktop, and WebRTC) they all will be branded consistently within their respective environment.

To learn how to configure a Reseller entity, or to learn how to configure any of our Softphone solutions, please contact [support@telinta.com](mailto:support@telinta.com) 24x7.

If you wish to add one of Telinta's Softphone solutions, please contact [info@telinta.com](mailto:info@telinta.com) for pricing. Each version is a separate Telinta solution, and priced accordingly. As always, our non-brandable Desktop and WebRTC solutions are available at no additional cost.
