News Flash

New Conference Recording Mode in TeliCon.

[TeliCon™](#) is our feature-rich Audio-Conferencing solution, fully integrated into our world-class hosted VoIP Softswitch and Billing platform for VoIP providers. Our solution includes brandable web portals, customizable multi-language IVR, virtually unlimited number of conference rooms, with all the features and controls your users can rely on.

Recently, Telinta engineers added a new **Automatic Recording** option for TeliCon in addition to the standard **On-Request** recording feature. With this option enabled, the conference moderator doesn't need to manually start the recording, it will be enabled automatically when there is more than one participant in the conference room. The new recording option is already available in the conferencing room settings.

TeliCon Audio-Conferencing is an important value added service for your business customers.

General Info	Advanced Settings	Music On Hold
Wait for moderator: <input type="checkbox"/>	Limit conference duration: <input type="checkbox"/>	Conference duration: <input type="text"/> minutes
Lock the conference after all participants exit: <input type="checkbox"/>	Maximum participants: <input type="text" value="15"/>	Mute options: <input type="text" value="Participants can mute/unmute themselves"/>
Announce number of participants: <input checked="" type="checkbox"/>	Announce name: <input type="text" value="Announce name, without review"/>	Conference recording: <input type="text" value="Auto"/>

Solutions

New Auto-Provisioning Profiles for Mitel 6865, 6867, 6869.

Initial configuration of IP phones is extremely important for proper performance and to avoid problems at the customer premises.

New Auto-Provisioning Profiles for Mitel 6865, 6867, 6869, continued:

Telinta has created many Auto-Provisioning Profiles which enable our customers to automatically provision and update any number of end-user devices directly from Telinta's TeliCore Administrative Interface without the need for manual configuration. Most recently, Telinta created Auto-Provisioning Profiles for IP phones made by Mitel. With 45 years of industry leadership, Mitel helps businesses connect, collaborate, and provide better experiences for their customers. Mitel is trusted by 70 million business users in more than 100 countries. Mitel SIP phones offer exceptional features and flexibility in an open-standard enterprise grade IP telephone.

More Solutions

New Provider Supported via API.

Telinta [believes](#) that APIs are an important tool for your VoIP business. TeliCore is integrated with a wide variety of third-party service providers for [DIDs](#), [Tax Solutions](#), [Mobile Top-Up](#), [SMS](#), [Voice-to-Text](#), [CNAM](#), E911, and [more](#). This enables Telinta customers to have an easy access to multiple services from the same platform.

Many Telinta customers use APIs to order and assign DID numbers via their TeliCore web interface with just a few mouse clicks.

We are happy to announce that a new company was added to the list of supported DID API providers:

Inteliquent - <https://www.inteliquent.com>

Inteliquent is a leading Communications Enabler offering network-based voice and messaging services to wireless, cable, carrier and communication service providers.

Thousands of service providers in North America and around the world rely on the quality, reliability, and reach of Inteliquent's network to deliver hundreds of millions of phone calls and text messages every day. Inteliquent's network carries more than 22+ billion voice minutes a month, serves over 196 markets and reaches over 9,400 on-net rate centers.

Please contact support@telinta.com to learn more about this new API and enable it for your partition.
