New Auto-Provisioning Profiles for Yealink T31P/T31G

Telinta has developed an Auto-Provisioning Profile for the Yealink T3 series of IP phones. This automated capability enables Telinta customers to deploy any number of IP devices, without the need for manual configuration.

This means Telinta customers can easily provision these Yealink phones directly from their TeliCore™ Administrative Interface, without logging into a third-party portal. In addition to the Yealink T3 series, Telinta offers Auto-Provisioning Profiles for hundreds of popular IP phones, ATAs, and other devices from leading manufacturers.

Since 2002, Telinta's Auto-Provisioning has been used reliably by VoIP service providers around the world with IP devices made by Cisco, Polycom, Yealink, Snom, Grandstream, Fanvil, Gigaset, Uniden, Panasonic, VTech, and other manufacturers.

Best Practices

Call Parking and BLF Monitoring.

Call parking is a popular Hosted PBX feature that enables your users to place an active call on hold, which can then be picked up later by another PBX extension. After the call is parked, your user can freely make and receive other calls.

Telinta has improved Call Parking by developing "slot" parking and a BLF monitoring function. This significantly improves the capability and allows more efficient management of calls.

Please contact support@telinta.com to enable Call Parking for your Environment.

News Flash

Northern911 Provider Integration.

Telinta's cloud-based TeliCore platform includes APIs for many third-party providers who offer services which complement our sophisticated softswitch and billing solutions.

We recently integrated emergency calling services (E911) provided by Northern911. This integration helps Telinta customers offer E911 services for both the United States and Canada.

Please contact support@telinta.com to learn more about enabling this API for your Environment.

WebSMS2u SMS Provider Integration.

Telinta recently integrated an additional SMS provider, WebSMS2u. This provider can be used for services such as marketing broadcasts, SMS Campaigns, automated notifications, online ordering.

The company is located in Malaysia and has been providing service worldwide for over 20 years.

Please contact support@telinta.com to enable this SMS API for your Environment
