Solutions

Telinta enhances its TeliGlobe™ Mobile Softphone to show a list of PBX Extensions

Telinta recently enhanced our brandable TeliGlobe™ Mobile Softphone solution for both Android and Apple iOS mobile device.
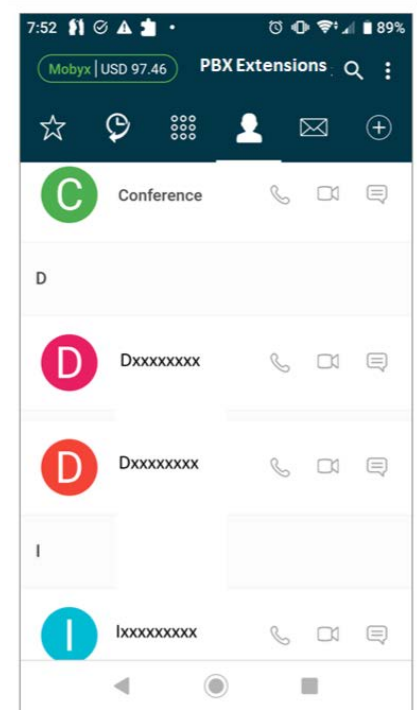

Your end users can now easily pull up a list of PBX extensions within their TeliGlobe app, in addition to the contact list already on their device.

TeliGlobe's brandable option enables you to customize your Mobile Softphone app with your own brand name, logo, promotional text, a rate calculator, a "contact us" option, and the ability for users to "invite friends and family" to also sign up for service.

Please contact info@telinta.com for more information.

Best Practices

API Security Best Practices

Telinta's cloud-based TeliCore™ softswitch platform includes APIs integrating many industry-leading providers to help your VoIP business grow. Telinta customers can benefit from our Best Practices to help securely use these APIs.

APIs enable you to easily integrate services you purchase from different providers into a cohesive solution that you offer to your customers. Examples of services currently integrated into TeliCore include: DIDs, Mobile Top-Up, Payment Services, SMS, Tax Calculations, E-911, Voicemail-to-Text, and more.

Not only does Telinta integrate APIs for other providers, but our own hosted solutions can be offered to you via API, so that you can integrate our platform as the back-end for services you offer via your own front-end web interface.

Best Practices, continued

Our online KnowledgeBase (exclusively for Telinta customers) includes many examples of how to use APIs, and many more important configurations. For example, using tokens instead of standard login/password credentials may be a more secure way to authenticate the applications you use via APIs.

The Add/Edit User page on TeliCore's interface allows you to create a special user account in which you can generate the necessary token for use in API requests.

Please contact support@telinta.com for more information.

News Flash

Celebrating Two Decades Of Success

2022 marks Telinta's 20th anniversary!

Since February of 2002, Telinta has helped VoIP service providers from around the globe succeed. We are very proud to provide the most reliable, flexible, scalable and secure solutions. Over the past two decades, Telinta has grown as a company and we are today trusted worldwide as a premier provider of hosted VoIP switching and billing solutions.

We have won multiple awards at prestigious industry forums; we are covered by major technology news media around the world. Many other industry leaders from various parts of the world seek to work together with Telinta, helping to broaden our comprehensive ecosystem of partners.

Our main facilities are located in a state-of-the-art datacenter near New York City, with additional facilities in key global markets: Bangalore, Dallas, Frankfurt, London, New York, Newark, San Francisco, Singapore, Toronto, and Tokyo.

Special Offer:

We'd like to invite our current Telinta customers to share in this celebration with one month free for any new Optional Service offered by Telinta added to your Environment during the months of January-February, 2022.

Optional Services are additional capabilities that our customers can choose as ways to enhance their VoIP business. Included in this special anniversary offer: TeliGlobe One and TeliGlobe Brandable Mobile Softphone, Brandable Desktop Softphone and WebRTC, plug-in for Google Voicemail Transcription, PayPal plug-in, Voice VPN, VoIP Calling for Telegram Social Media (Telinta per-user fee), and our TeliSIM™ plug-in.

Please contact info@telinta.com for details on how to add a new Optional Service.

Your opinion counts.
