## Issue N°27

## OCTOBER 2017 EDITION

The screenshot displays the Telinta Distributor Interface. On the left, there's a sidebar with navigation links: Recharge, Personal Information, Credit Card Information, Distributor Information, and Short Statistics. The main area shows the 'Distributor Information' form, which includes fields for Distributor Name, Status (Active), Balance, Credit Limit, Available Funds, Currency, Accounts, Sale Commission, Recharge Commission, Value Transfer Commission, and Prepaid Commission. Below this is a 'Short Statistics' table showing Time Range, Sale, and Commission for Today, This Month, and Last Month. The right side of the interface contains a 'General Information' section with fields for Active status, Login, Password, Phone, Email, Language, and Time Zone. It also includes a 'Billing Information' section with Credit Limit, Credit Limit Warning Threshold, and Commissions (Sale, Recharge, Mobile Top-Up). An 'Advanced Configuration' section at the bottom allows for Representative, Cloning Rules, and Rule settings.

### Telinta Enhances Its Distributor Interface.

Telinta provides a unique Distributor Interface as a standard part of our TeliCore™ platform. This interface enables Telinta customers to easily organize a network of Distributors for their [Calling Cards](#), [Pinless](#) and [Mobile Softphone](#) services.

Telinta recently enhanced our Distributor Interface so that your Distributors can also provide [Mobile Top-Up](#) services. This enables end users to recharge prepaid cellular service offered by leading mobile operators around the world. Mobile Top-Up can be a powerful new revenue source for the both Telinta customers and their Distributors.

Your Distributors can also recharge prepaid balances for [Nauta WiFi](#) in Cuba, a rapidly growing market. Nuata added 180 new WiFi hotspots this year in Cuba and expects this number to keep growing.

Please contact [support@telinta.com](mailto:support@telinta.com) to learn more about our Distributor Interface.

## News Flash

### Telinta adds Call Recording export to Amazon S3 bucket

Call recording is an important, and in some cases, necessary service for business customers. Telinta customers have full control over this option. This includes the ability to export recordings to store them outside of TeliCore for an extended period of time.

While Telinta currently offers both FTP and rsynch as convenient methods to export call recordings, we are happy to introduce a new option to export stored recordings to [Amazon S3](#). Amazon S3 runs on the world's largest global cloud infrastructure, and provides a convenient storage option for Telinta customers. In addition to Amazon S3, you can easily export call recordings to industry-leading storage providers such as Google Drive and Dropbox.

## Best Practices

### SMS Messaging in TeliCore.

Various Over-the-Top (OTT) applications such as WhatsApp, Facebook Messenger and WeChat have resulted in substantial decrease in P2P (person-to-person) SMS usage. Nevertheless SMS remains a crucial service for millions of people. TeliCore enables you to use SMS notifications via API integration with multiple SMS providers. SMS notifications can be a valuable addition to the email notifications currently available in TeliCore.

Telinta engineers introduced a new SMS-related option - bulk SMS messaging via the customer self-care interface. This enables you to easily send SMS messages to groups of numbers.

Stay tuned for details on an SMS option coming soon for our [TeliGlobe](#)™ mobile softphone solution.

## Your opinion counts.
