#### Custom Online Transaction Fees

One of the most important parts of a billing platform is the ability to collect Credit Card payments from end users. A Credit Card Payment Processor (also called a Payment Gateway) provides important services that can help your VoIP business.

TeliCore™ already has numerous Payment Gateway providers integrated and available to you. Usually Payment Gateway providers charge transaction fees for their services, for example, a percentage or a small transaction fee.

Telinta has enhanced our online payment capabilities, adding the option for you to define a transaction fee that you can charge your customers. To define a transaction fee, please modify the payment processor name and add the following string:

Isdeductfee<amount>

or

Isdeductpercentfee<amount>

For example, Isdeductfee0.25 will deduct \$0.25 USD from any customer online payment transaction, Isdeductpercentfee1 will deduct 1% from the payment amount.

## Solutions

### Credit Card Calendar Periodic Payments

Fast, convenient automatic payments can benefit both you and your customers. When configured by either your administrator or your end user, recurring payments are automatically charged to the user's credit card and applied to the user's balance.

There are multiple automatic payment options available in TeliCore:

- ▶ Balance-driven payments, which are triggered by certain conditions involving a customer's balance. When the customer's balance is lower than the specified threshold, payment is initiated automatically.
- ▶ Automated payment, which is applied when closing an invoice. The customer's credit card is charged for the invoice's amount due, so that when the invoice is created it shows an amount due of zero.

Telinta has introduced a new option for automatic payments: **Calendar Payments**, which can occur every month, every week, etc. This is a convenient way to charge a customer their full balance, or some other pre-defined amount, at certain intervals.

Please contact [support@telinta.com](mailto:support@telinta.com) to enable this option for your partition.

## Solutions

### Enhanced Mobile Top-Up Services

Mobile Top-Up is a rapidly growing and profitable service. This means service providers in any part of the world can sell prepaid mobile airtime. With the help of our Mobile Top-Up [partners](#), Telinta enables you to provide brandable Mobile Top-Up services to end users, as well as an unlimited number of resellers.

Telinta engineers have enhanced our integration with TransferTo, enabling Telinta customers to define different commissions for every country and mobile operator. This makes your Mobile Top-Up services more competitive in the rapidly growing market and creates opportunities for higher margins.

Please contact [support@telinta.com](mailto:support@telinta.com) to learn more about this feature.
