Solutions

MMS support in TeliGlobe™ Mobile Softphone

Telinta has recently added MMS capabilities for our TeliGlobe™ Mobile Softphone solution. This brandable solution is available for both Apple iOS and Android devices. The app can be easily downloaded for free by your end users from both Apple iTunes and Google Play. TeliGlobe enables you to easily add a mobile option to any VoIP service that you offer using Telinta's hosted softswitch and billing solutions.

MMS-enabled DIDs from *Endstream* and *VI Communication Services* (formerly VoIP Innovations) can be used to send and receive MMS with TeliGlobe. As part of Telinta's comprehensive ecosystem of partners, these providers give Telinta customers a range of options to meet their needs. Please contact partners@telinta.com for an introduction.

TeliGlobe's brandable option enables you to customize your Mobile Softphone app with your own brand name, logo, promotional text, a rate calculator, a "contact us" option, and the ability for users to "invite friends and family" to also sign up for service.

Please contact info@telinta.com for more information.

Best Practices

New Online Sign-Up User Guide

Telinta provides useful and practical guides for important functions used in our solutions.

Our new guide for Online Sign-Up helps you enable your users to create an account with you online, using an e-mail address or username and password. Once your user has signed up for a service, they can access their account by securely logging in.

The Online Sign-Up User Guide contains practical information on how to make the process more convenient and efficient. Online sign-up can help grow your business and streamline your costs.

Please contact support@telinta.com for more information.

More Solutions

Highly-Economical Voicemail Transcription from Google Cloud

Telinta customers can now offer highly affordable voicemail transcription from Google Cloud.

Google Cloud's automated transcription enables VoIP service providers to easily transcribe voicemails on Telinta's softswitch platform, and deliver the text to end users via a predefined email address.

Google Cloud's sub-penny pricing provides an extremely cost-effective solution for automated voicemail-to-text (v2t) transcription in over 125 languages and dialects using the Telinta customers own Google Cloud account.   Google Cloud provides options specially optimized and tuned for telephony. Google Cloud's terms of service and pricing applies.

Telinta's plug-in for Google Cloud is required to use the service for a cost of $25 per month.   The plug-in enables unlimited voicemail transcriptions across your entire Environment and for all your resellers.

To add the plug-in, please contact: info@telinta.com
